Intraoral Sensor

Technical Info

DESCRIPTION AND INTENDED USE

I-View is a digital intraoral sensor based on CMOS (Complementary Metal-oxide Semiconductor) technology. The sensor is an image receptor which captures images obtained through an X-Ray unit; I-View allows the user to obtain a small pixel size (20 μm), thereby ensures excellent spatial resolution. The sensor is composed by these parts:

I-VIEW is available in two sizes:

- I-View size 1, 30 x 20 mm active area
- I-View size 2, 33 x 25 mm active area

Code IS004 I-View intraoral sensor size 1
Code IS005 I-View intraoral sensor size 2

Key Features

- Rounded off edges
- Smooth casing
- Outstanding cable flexibility,
- Direct connection to personal computer for image acquisition via USB direct connector.
- Cesium Iodide (CsI) scintillator layer
- Available in two formats: standard size 1 and size 2
- I-View works with Deep-View, the software to capture and manage images developed for Trident.
